iBabyGuard™ Infant Snooze

A newborn baby may sleep as much as 16 hours or more a day. It is vital to monitor your little one's sleep to ensure that your baby is safe and sound.

However, it can be physically demanding to constantly check on your baby while juggling with daily activities. At iBabyGuard™, we share the same joy and concern with new parents all over the world as they embark on their journey into parenthood. The iBabyGuard™ Infant Snooze is every parents' essential tool for a Peace of Mind.

Because Your Baby Matters...

Why iBabyGuard™ Infant Snooze:

✓ Only iBabyGuard™ Infant Snooze

- * DETECTS & ACTIVELY DISPLAYS your baby's breath count to better monitor your sleeping baby
- * Giving you a True Peace of Mind

Audio Monitors

- * Can only hear sounds that baby makes
- * What if baby chokes on milk?

Parents/Caregivers

- * Impossible to keep watch on baby 24/7
- * A baby who has stopped breathing looks sound asleep

Limitations

Video Monitors

- * Requires constant monitoring
- * A baby that has stopped breathing looks sound asleep

Movement Monitors

- * Mattress dependant therefore not portable
- * Electrical Cord may pose strangulation risks

iBabyGuard™ Infant Snooze is not a medical device nor a device that prevents Sudden Infant Death Syndrome (SIDS) or 'cot death'. Babies with a known predisposition to any breathing abnormality including apnea should be monitored by a doctor. Please seek advice from doctors or health care professionals for medical diagnosis or when unsure of any symptoms.

iBabyGuard™ Infant Snooze is NOT a substitute for proper adult supervision. It is important that an adult stays within range of the iBabyGuard™ Infant Snooze at all times during use. It calls for your attention when it detects potentially dangerous situations. Never neglect the safety guidelines on baby's sleeping conditions.
